### DETAILED ACTION

Claims 1-16 are pending.

#### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 4, 7-9, and 15, drawn to a method of gene therapy comprising administering at least one recombinant adeno-associated virus (rAAV) virion comprising an AAV-6 capsid and a heterologous nucleic acid operably linked to a expression control elements, wherein said heterologous nucleic acid is a gene encoding a protein, classifiable in class 424, subclass 93.2.
- II. Claims 5 and 6, drawn to a method of gene therapy comprising administering at least one recombinant adeno-associated virus (rAAV) virion comprising an AAV-6 capsid and a heterologous nucleic acid operably linked to a expression control elements, wherein said heterologous nucleic acid is an anti-sense RNA or a ribozyme, classifiable in class 424, subclass 93.2.

The inventions are distinct, each from the other because of the following reasons:

Invention I and Invention II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions are distinct because delivering an anti-sense RNA to a mammal and delivering a nucleic acid encoding a protein have different functions and different effects. The specification does not teach that delivering an anti-sense RNA to a mammal and delivering a nucleic acid encoding a protein are capable of use together.

Art Unit: 1635

Claims 3 and 10-14 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 3. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and the search for each group is not co-extensive, restriction for examination purposes as indicated is proper.
